About this item

- **[Non slip furniture pads]** The Non slip furniture pads use silicone material with good anti slip effect. Excellent grippy material for holding stuff down on slippery surfaces. It's easy to cut with any scissors, and the value is amazing for how much you get in a roll. It's not too thick, so it's not noticeable when applied to stuff. such as hand-held coffee grinder, incense burner, keyboard, equipment, frame, metal water bottle, headphone holder, microwave, etc.
- **[Easy to apply and cut to size needed.]** 40x5x0.04 inch (102x13x0.1 cm), The self adhesive cuttable furniture pads can be cut to fit a variety of furniture to your needs. Strip, square, rectangle, circle, triangle, irregular shape ... as long as you want.
- **[Durable, and invisible]** You can use small pieces for the bottom of your audio/video equipment to prevent sliding on your desk. Also great for softening cabinet doors to prevent slamming doors and reducing noise in your home. Suitable for any furniture and appliances:

cabinets, counter, drawers, doors, etc. You can use this to keep various electronic devices in your studio from sliding around. It's thin enough not to affect any clearances and it has excellent grip.

- **【High quality backing sticks well】** These anti-slip pads are made from highly durable and wear-resistant silicone. This is Great!! Easy to cut, easy to peel, sticks great.
- **【100% Satisfaction】** Note: this non slip furniture pads has no anti-slip effect on wet surfaces. We provide worry-free lifetime warranty (no man-made) and friendly customer service. If you have any problems (quality problem or wrong quantity) or are not satisfied with the products, please contact us and we will solve them in time. Note: If you need to slide and move the chair frequently, this product may not be suitable for you. You should try a product with bottom felt by us.

This stuff stops the sliding!

Reviewed in the United States on January 26, 2026

Verified Purchase

My living room sofa sits on engineered hardwood floors and every time I would try to push the cushions in as they would work out as people sat on it the whole couch would move. I purchased this nonslip material not thinking it was going to help much because my couch sits on little circle tips on the legs but it totally stopped sliding using just small pieces I highly recommend it for people with the same situation. I don't know how it does it but it stops the sliding!

It works great. We have old cast iron door stops. And it works great to keep them from sliding on tile

Not Just for Furniture—These Pads Are Game-Changer!

Reviewed in the United States on July 31, 2025

Amazon Vine Customer Review of Free Product (What's this?)

These non-slip silicone furniture pads were a pleasant surprise—I originally got them for keeping my furniture from sliding on my tile floors, but decided to test them out on my tool cart while working on our motorcycle. And wow... what a difference!

I cut them to size and stuck them on the shelves of my rolling cart. The adhesive backing is strong, super easy to work with, and once the pads were down, my tools didn't move an inch—no more chasing sockets or screw drivers every time I bump the cart or roll it across the garage. Total game-changer for garage projects.

The material is flexible but durable, and the grip is seriously impressive. I imagine these would work just as well under furniture legs, especially on hardwood or tile floors. Whether you're keeping a sofa from scooting or making your workspace less chaotic, these little pads get the job done.

Works as intended

Reviewed in the United States on September 14, 2025

Amazon Vine Customer Review of Free Product ([What's this?](#))

These anti-slip furniture pads work exactly as intended. After applying them, my chairs and tables stay firmly in place on the hardwood floor without sliding around. They're easy to use, provide good grip, and also help protect the floor from scratches. A practical and effective solution for keeping furniture stable on hardwood floor and other hard surfaces.

A Simple Fix That Helped My Elderly Aunt Stay Safe

Reviewed in the United States on July 31, 2025

Amazon Vine Customer Review of Free Product ([What's this?](#))

I bought this to help my 98-year-old aunt who kept slipping when getting in and out of her mobility chair due to her slippery polyester clothing. These non-slip silicone pads added just enough grip to keep her stable without being bulky or hard to apply.

 **Strong Grip:** Silicone material offers excellent non-slip performance

 **Custom Fit:** I was able to quickly cut strips, and apply to the chair- any size or shape

 **Discreet & Quiet:** Ruby can safely sit on it and it serves as a safety back stop

 **Sticky & Durable:** Backing adheres well and stays put on surfaces, even to her mobility chair (not quite a wheel chair but more of a elongated chair that she can also nap in and not fall off)

Best rug grippers to date!!

Reviewed in the United States on August 13, 2025

Amazon Vine Customer Review of Free Product ([What's this?](#))

Recently I replaced a lot of rugs just from usual wear and tear over the years but this time I decided I wanted to also make sure they didn't slide around the house and areas like our previous ones did. I'm so glad I chose this type of double sided silicon to prevent them from sliding since I've bought the precut ones in the past had to modify or they didn't stick well and these I'm happy to report haven't came off and my rugs haven't moved since I installed! I highly recommend!

Perfect for 3D printing projects

Reviewed in the United States on August 9, 2025

Amazon Vine Customer Review of Free Product ([What's this?](#))

I always have a roll of this 3M silicone adhesive for 3D printing projects.

It says this is for furniture, but it absolutely works for anything that you need a little bit of traction on. I use these for 3D printed magnets that hold better onto the board because the silicone grips to the whiteboards easily, and combined with the magnet they absolutely don't move.

5/5 would buy again.
